

BiOGAS Products Ltd

Client: Severn Trent Water
Contractor: Mott Macdonald Bentley
Location: Rushmoor WwTW (Nr Telford)
Value: £51,745

Project scope:

Supply and install a double membrane gas holder.

Design Requirement:

We provided a 500m³ gas holder operating at 22mbar pressure with air blowers and control valves that could handle occasional large gas outflows. All equipment had to comply with the requirements of Severn Trent Water specifications.

Services provided:

We designed, supplied, installed and commissioned the double membrane gas holder and associated equipment.

Products supplied:

1 no 500m³ double membrane gas holder complete with a gas detection system and lightning protection.
